UNAUDITED SUPPLEMENTARY FINANCIAL INFORMATION (CONTINUED)
12. Liquidity
(a) Liquidity Maintenance Ratio (LMR)

	Quarter ended 31 December 2019	Quarter ended 31 December 2018
Average LMR for 3 months periods	<u>39.81%</u>	<u>38.12%</u>

(b) Core Funding Ratio (CFR)

	Quarter ended 31 December 2019	Quarter ended 31 December 2018
Average CFR for 3 months periods	<u>100.54%</u>	<u>100.86%</u>

The average LMR & CFR are calculated based on the arithmetic mean of each month's corresponding average ratios for the quarter, which are made in accordance with the requirements specified under Banking (Disclosure) Rules ("BDR").

The liquidity information can be found in the Regulatory Disclosures section of our website www.uobgroup.com/hk.

UNITED OVERSEAS BANK LIMITED, HONG KONG BRANCH

UNAUDITED SUPPLEMENTARY FINANCIAL INFORMATION (CONTINUED)

12. Liquidity (continued)

(c) Liquidity Risk Management

Liquidity risk is the risk arising from a bank's potential inability to meet all its financial or payment obligations when they fall due or only being able to meet these obligations at significant costs or losses.

The objective of the Branch's liquidity risk management align with the Group's risk management framework which is to ensure that the Branch maintains sufficient liquidity to fund our day-to-day operations, to meet deposit withdrawals and loan disbursements, to participate in new investments and to repay borrowings. Hence, liquidity is managed in a manner to address known as well as unanticipated cash funding needs.

Liquidity risk is managed in accordance with a framework of policies, controls and limits approved by the Group ALCO. These policies, controls and limits enable the Branch to monitor and to manage liquidity risk to ensure that sufficient sources of funds are available over a range of market conditions. These include minimising excessive funding concentrations by diversifying the sources and terms of funding, and maintaining a portfolio of high quality and marketable debt securities.

The Branch takes a conservative stance on liquidity management by continuing to gather core deposits, ensuring that liquidity limits are strictly adhered to and that there are adequate liquid assets to meet cash shortfall.

The distribution of deposits is managed actively to ensure a balance between cost effectiveness, continued accessibility to funds and diversification of funding sources. The Branch establishes concentration limits on collateral pools and sources of funding, such as concentration of bond securities holding and concentration of top 20 depositors. Important factors in ensuring liquidity are competitive pricing, proactive management of the Branch's core deposits and the maintenance of customer confidence.

The Branch's liquidity risk is aligned with the regulatory liquidity risk management framework and is measured and managed on a projected cash flow basis. The Branch is monitored under business-as-usual and stress scenarios. Cash flow mismatch limits are established to limit liquidity exposure. The Branch also employs liquidity early warning indicators and trigger points to signal possible contingency situations.

The Branch has contingency funding plans in place to identify potential liquidity crises using a series of warning indicators. Crisis management processes and various strategies including funding and communication have been developed to minimise the impact of any liquidity crunch.

The Branch follows the Group's guidelines and standards on acceptability of specific collateral for credit risk mitigation. Collateral is taken whenever possible to mitigate the credit risk assumed and the value of the collateral is monitored periodically. The main types of collateral are cash, marketable securities, real estate, equipment, inventory and receivables.
