

UNITED OVERSEAS BANK LTD - MUMBAI BRANCH

(Incorporated in Singapore with limited liability)

Disclosure on Bank's strategy and progress on Ind AS implementation during FY 2016-17

The Ministry of Finance, Government of India has vide its press release dated January 18, 2016 outlined the roadmap for implementation of International Financial Reporting Standards (IFRS) converged Indian Accounting Standard (Ind AS) for Banks, Non-Banking Financial Companies and Insurance Companies. RBI has advised banks vide RBI/2015-16/315 DBR.BP.BC.No.76/21.07.001/2015-16 dated February 11, 2016 to follow the Ind AS as notified under the Companies (Indian Accounting Standards) Rules, 2015 subject to any guidelines /direction issued in this regard. For Banking companies, the implementation of Ind AS will begin from April 1, 2018 onwards, with comparatives for the year beginning April 1, 2017.

As per Reserve Bank of India (RBI) directions, Bank has taken following steps so far:

- Submitted Proforma Ind AS financial Statements to the RBI for the half-year ended September 30, 2016, as required under the guidelines.
- Formed Steering committee for Ind AS Implementation. The Steering Committee comprises of representation from Finance, Compliance, Operations and Technology. The Committee oversees the progress of Ind AS implementation in the Bank, and provides guidance on critical aspects of the implementation.
- Evaluating its current IT solution to automate changes on implementation of Ind AS.

BASEL III- PILLAR 3 DISCLOSURES FOR THE YEAR ENDED 31 MARCH 2017

The RBI guideline on 'Basel III Capital Regulation' was issued on May 2, 2012 for implementation in India in phases with effect from April 1, 2013 and to be fully implemented by March 31, 2019. United Overseas Bank Ltd, Mumbai Branch is subject to the RBI Master Circular on Basel-III Capital Regulations, July, 2015 and amendments thereto issued on time to time basis by RBI. The Basel III framework consists of three mutually reinforcing pillars:

- Pillar 1 - Minimum capital requirements for credit risk, market risk and operational risk
- Pillar 2 - Supervisory review of capital adequacy
- Pillar 3 - Market discipline

Market discipline (Pillar 3) comprises a set of disclosures on the Capital Adequacy and Risk Management framework of the Bank. Pillar 3 disclosures as per RBI master circular on Basel-III Capital Regulations are set out in the following sections for information.

DF-1 Scope of Application

Qualitative Disclosures:

The disclosure and analysis provided herein below are in respect of the Mumbai Branch ("the Bank") of United Overseas Bank Ltd ("UOB") which is incorporated in Singapore. The parent, UOB provides a wide range of financial services through its global network of branches, offices, subsidiaries and associates; personal financial services private banking commercial and corporate banking, investment banking, corporate finance, capital market activities, treasury services, futures broking, asset management, venture capital management, insurance and stock broking services. UOB is rated among the world's top banks by Moody's Investors Service, receiving aa3 for baseline credit assessment and Aa1 and Prime-1 for long term and short term bank deposits respectively.

The Mumbai branch does not have any subsidiaries in India and is accordingly not required to prepare a consolidated return under the generally accepted accounting principles or under the capital adequacy framework.

- (a) List of group entities considered for consolidation:
Not Applicable.
- (b) List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation
Not Applicable.

Quantitative Disclosures:

- (a) List of group entities considered for consolidation.
Not Applicable.
- (b) The aggregate amount of capital deficiencies in subsidiaries:
Not Applicable.
- (c) The aggregate amount of the bank's total interests in insurance entities:
Not Applicable
- (d) Restrictions or impediments on transfer of funds or regulatory capital within the banking group as of March 31, 2017:
Not Applicable

Capital Structure:

Capital funds are classified into Tier-I and Tier-II capital under the capital adequacy framework.

Qualitative Disclosures:

(a) Summary information and main features of capital instruments are given below.

The Bank's Tier I capital will consist of Common Equity Tier I and Additional Tier I capital. Common Equity Tier 1 (CET1) capital must be at least 5.5% of risk-weighted assets (RWAs) i.e. for credit risk + market risk + operational risk on an ongoing basis and Additional Tier I capital can be a maximum of 1.5%, thus making total Tier I capital to be at least 7%.

In addition to the minimum Common Equity Tier 1 capital of 5.5% of RWAs, banks are also required to maintain a capital conservation buffer (CCB) of 2.5% of RWAs in the form of Common Equity Tier 1 capital which would be fully implemented by March 31, 2019. In terms of the RBI guidelines dated March 27, 2014 the CCB required as on March 31, 2017 is 1.25% of RWA.

Bank's Tier I Capital comprises of interest free funds provided by from Head Office, Statutory reserves and retained earnings net of debit balance in profit & loss account. The book values of goodwill, intangible assets and deferred tax assets and other regulatory adjustments are deducted in arriving at CET1 capital.

Bank's Tier II capital comprises of general loan loss provisions and country risk provision which is restricted to 1.25% of Credit RWAs as required by RBI regulations.

(b) The details of Tier I & Tier II capital with separate disclosures of each component are as under:

The Composition of the Capital structure:

(₹ '000)

Particulars	As at March 31, 2017	As at March 31, 2016
Paid up Capital (Funds from Head Office)	7,525,524	7,525,524
Statutory reserve	172,794	152,205
Remittable Surplus	400,216	-
Debit Balance in Profit and Loss Account	-	-
Regulatory Adjustment to CET I (Deferred Tax Asset & Intangible Assets)	(188,971)	(34,837)
CET 1 Capital	7,909,563	7,642,892
Additional Tier 1 Capital	-	-
Total Tier 1 Capital	7,909,563	7,642,892
Provision for Standard assets and Country Risk (Restricted to 1.25% of Credit Risk weighted Assets)	60,985	48,737
Tier 2 Capital	60,985	48,737
Total regulatory capital	7,970,548	7,691,629

DF-2 Capital Adequacy:

Qualitative Disclosures:

The Bank is subject to the Capital adequacy norms as per Master Circular on Basel-III Capital Regulations July 2015 and amendments thereto issued by the Reserve Bank of India ("RBI"). The Basel III capital regulation is being implemented in India from April 1, 2013 in phases and it will be fully implemented as on March 31, 2019. In view of the gradual phase-in of regulatory adjustments to the capital components under Basel III, certain specific prescriptions of Basel II capital adequacy framework shall also continue to apply till March 31, 2017.

As at March 31, 2017, the capital of the Bank is higher than the minimum capital requirement as per Basel-III guidelines.

The Bank has a process for assessing its overall capital adequacy in relation to the Bank's risk profile and a strategy for maintaining its capital levels. The process ensures that the Bank has adequate capital to support all the material risks and an appropriate capital cushion. The Bank identifies, assesses and manages comprehensively all risks that it is exposed to through robust risk management framework, control mechanism and an elaborate process for capital calculation and planning. The Bank has formalised and implemented a comprehensive Internal Capital Adequacy Assessment Process (ICAAP). The Bank's ICAAP covers the capital management policy of the Bank and also sets the process for assessment of the adequacy of capital to support current and future projections / risks. The Bank has a structured process for the identification and evaluation of all risks that the Bank faces, which may have an adverse material impact on its financial position.

The Bank's stress testing analysis involves the use of various techniques to assess the Bank's potential vulnerability to extreme but plausible ("stressed") business conditions. Typically, this relates, among other things, to the impact on the Bank's profitability and capital adequacy. Stress Tests are conducted on a quarterly basis on the Bank's on and off balance sheet exposures to test the impact of Credit, Liquidity risk and Interest Rate Risk in the Banking book (IRRBB). The stress test results are put up to the Risk Management Committee (RMC) of the Board on a quarterly basis, for their review and guidance. The Bank periodically assesses and refines its stress tests in an effort to ensure that the stress scenarios capture material risks as well as

UNITED OVERSEAS BANK LTD - MUMBAI BRANCH

(Incorporated in Singapore with limited liability)

reflect possible extreme market moves that could arise as a result of market conditions. The stress tests are used in conjunction with the Bank's business plans for the purpose of capital planning in the ICAAP.

The integration of risk assessment with business processes and strategies governed by a robust risk management framework under ICAAP enables the Bank to effectively manage risk-return trade off.

Pillar I

The Bank has adopted Standardised Approach for Credit Risk, Standardized Duration Approach for Market Risk and Basic Indicator Approach for Operational Risk for computing its capital requirement.

The total Capital to Risk weighted Assets Ratio (CRAR) as per Basel III guidelines works to 122.92% as on March 31, 2017 as against minimum regulatory requirement of 10.25% (9.00% + CCB 1.25%). The Tier I CRAR stands at 121.98% as against RBI's prescription of 8.25% (7.00% + CCB 1.25%). The Bank has followed the RBI guidelines in force, to arrive at the eligible capital, risk weighted assets and CRAR.

Quantitative Disclosure:

The Bank's capital requirements and capital ratios as of 31 March 2017 are as follows:-

(₹ '000)

Composition of Capital	As at March 31, 2017	As at March 31, 2016
1. Capital requirements for Credit Risk	452,173	381,864
- Portfolios subject to standardized approach		
- Securitisation Exposures		
2. Capital requirements for Market Risk (Subject to Standardized Duration Approach)		
- Interest rate risk	31,340	18,013
- Foreign exchange risk (including gold)	6,278	6,328
- Equity risk	-	-
3. Capital requirements for Operational Risk (Subject to basic indicator approach)	93,792	53,654
Total Capital Requirements at 9% (1+2+3)	583,583	459,859
Total Capital	7,970,548	7,691,630
Common Equity Tier I capital ratio (%)	121.98%	149.58%
Tier I Capital Adequacy Ratio (%)	121.98%	149.58%
Total Capital Adequacy Ratio (%)	122.92%	150.53%

Risk Exposure and Assessment

The Bank considers the following risks as material risks it is exposed to in the normal course of its business and therefore, factors these while assessing / planning capital:

- Credit Risk
- Market Risk
- Operational Risk
- Concentration Risk
- Residual Risk
- Liquidity Risk
- Interest Rate Risk in the Banking Book

Risk Management framework

The Bank is exposed to various types of risk. The Bank has separate and independent Risk Management Department in place which oversees all types of risks in an integrated fashion. The objective of risk management is to have optimum balance between risk and return. It entails the identification, measurement and management of risks across the various businesses of the Bank.

The Group Board has approved a risk management framework for all its entities within the Group, including its Mumbai branch.

The assumption of financial and non-financial risks is an integral part of the Group's business. The Group's risk management strategy is targeted at ensuring proper risk governance so as to facilitate on-going effective risk discovery and to efficiently set aside adequate capital to cater for the risks. Risks are managed within levels established by the Group Management Committees, and approved by the Board and its committees. The Group has a comprehensive framework of policies and procedures for the identification, assessment, measurement, monitoring, control and reporting of risks. This framework is governed by the appropriate Board and Senior Management Committees. The Board and the Senior Management Committees have the overall responsibility for risk management and risk strategies in the Bank.

The Group applies the following risk management principles:

1. Delivery of sustainable long-term growth using sound risk management principles and business practices;

2. Continual improvement of risk discovery capabilities and risk controls; and
3. Business development within a prudent, consistent and efficient risk management framework.

DF-3 Credit Risk

Credit risk is defined as the possibility of losses associated with diminution in the credit quality of borrowers or counterparties. In a bank's portfolio, losses stem from outright default due to inability or unwillingness of a customer or counterparty to meet commitments in relation to lending, trading, settlement and other financial transactions.

The Bank adopts the definition of 'past due' and 'impaired credits' (for accounting purposes) as defined by Reserve Bank of India under Income Recognition, Asset Classification and Provisioning (IRAC) norms (vide RBI Master Circular dated July 1, 2015).

Credit Risk Management policy The Bank relies on the Groups credit policies and processes and adhering to the directives and guidelines issued by RBI to manage credit risk in the following key areas:-

• Credit Approval Process

To maintain independence and integrity of the credit approval process, the credit approval function is segregated from the credit origination. Credit approval authority is delegated through a risk-based Credit Discretionary Limits ("CDL") structure that is tiered according to the borrower's rating. Delegation of CDL follows a stringent process that takes into consideration the experience, seniority and track record of the officer. All credit approving officers are guided by product programmes. These credit policies, guidelines and product programmes are periodically reviewed to ensure their continued relevance.

• Credit Risk Concentration

A risk-sensitive process is in place to regularly review, manage and report credit concentrations and portfolio quality. This includes monitoring concentration limits and exposures by obligors, portfolios, borrowers, industries and countries. Limits are generally set as a percentage of the Group's capital funds.

Obligor limits ensure that there is no undue concentration to a group of related borrowers that may potentially pose a single risk to the Group.

Portfolio and borrowers limits ensure that lending to borrowers with weaker credit ratings is confined to acceptable levels. These limits are generally tiered according to the borrower's internal ratings.

Industry limits ensure that any adverse effect arising from an industry-specific risk event is confined to acceptable levels.

The Bank adopts a credit risk strategy and risk appetite, which is in line with its risk taking ability to ensure conservation and growth of shareholder funds, with a proper balance between risk and reward. Financial resources are allocated to best optimise the risk reward ratio.

- Ensuring that all economic and regulatory requirements are complied.
- Ensuring that the portfolio is consistent with the Bank's strategy and objectives especially in relation to risk concentration, maturity profile and liquidity management

DF-4 Credit Risk: Disclosures for Portfolios subject to Standardised approach

Qualitative Disclosure

The Bank has used the ratings of the following external credit rating agencies (arranged in alphabetical order) for the purposes of risk weighting their claims for capital adequacy purposes:

- Brickwork Ratings India Pvt. Limited (Brickwork)
- Credit Analysis and Research Limited (CARE)
- Credit Rating Information Services of India Limited (CRISIL)
- ICRA Limited (ICRA)
- India Ratings and Research Private Limited (India Ratings) and
- SME Rating Agency of India Ltd (SMERA)

International credit rating agencies (arranged in alphabetical order) for the purposes of risk weighting their claims for capital adequacy purposes where specified:

- Fitch;
- Moody's; and
- Standard & Poor's

The Bank has used the ratings assigned by the above credit rating agencies for credit facilities provided to its customers

A description of the process used to transfer public issuer ratings onto comparable assets in the banking book:

- Bank has used short term ratings for assets with maturity upto one year and long-term ratings for assets maturing after one year as accorded by the approved external credit rating agencies.
- Bank has not cherry picked ratings. Bank has not used one rating of a CRA (Credit Rating Agency) for one exposure and another CRA's rating for another exposure on the same counterparty unless only one rating is available for a given exposure.
- If an issuer has a long term external credit rating that warrants RW (Risk Weight) of 150%, all unrated exposures on the same issuer whether long or short is assigned the same 150% RW unless mitigated by recognised Credit Risk Mitigation (CRM) techniques.
- Bank has used only rating from the recognised CRAs. In case the issuer has multiple ratings from CRAs, the Bank has a policy of choosing (if there are two or more ratings) lower rating.
- No recognition of CRM technique has been taken into account in respect of a rated exposure if that has already been factored by the CRA while carrying out the rating.

Quantitative Disclosure

Details of credit exposures* (funded and non funded**) classified by risk buckets

The table below provides the break-up of the Bank's net exposures* into three major risk buckets.

(₹ '000)

Sr. No.	Exposure amounts after risk mitigation	Fund Based Exposure*	Non Funded** Exposure
1	Below 100% risk weight exposure outstanding	9,487,456	757,112
2	100% risk weight exposure outstanding	1,959,565	-
3	More than 100% risk weight exposure outstanding	-	-
4	Deducted (represents amounts deducted from Capital funds)	-	-
	Total	11,447,021	757,112

*Represents book value as at March 31, 2017

Notes:

- Fund based credit exposure excludes Balance with RBI, Balances with Banks, SLR investments, Fixed and Other assets.
- Non-fund based exposure includes LC Acceptances, Bank Guarantees at book value as on March 31, 2017 and Forward Contracts exposure under current exposure method.

DF-5 Credit Risk Mitigation: Disclosures for Standardised Approaches

Qualitative Disclosures

1) Policies and processes for and an indication of the extent to which the bank makes uses of on- and off-balance sheet netting:

Bank makes use of on-balance sheet netting which is confined to loans/advances and deposits, where Bank has legally enforceable netting arrangements, involving specific lien with proof of documentation.

2) Policies and processes for collateral valuation and management:

As stipulated by the RBI guidelines, the Bank uses the comprehensive approach for collateral valuation. Under this approach, the Bank reduces its credit exposure to counterparty when calculating its capital requirements to the extent of risk mitigation provided by the eligible collateral as specified in the Basel III guidelines.

3) The Bank adjusts the value of any collateral received to adjust for possible future fluctuations in the value of the collateral in line with the requirements specified by RBI guidelines. These adjustments, also referred to as 'haircuts', to produce volatility-adjusted amounts for collateral, are reduced from the exposure to compute the capital charge based on the applicable risk weights.

4) The bank has credit mitigation in form of SBLC from UOB group companies and also direct corporate guarantee for some network clients. These are SBLC from UOB group companies and CG from strong/well banked network clients and hence considered acceptable mitigation.

5) Description of the main types of collateral valuation and management:

Bank presently accepts deposits (deposited with the Bank) as eligible financial collateral

6) Information about (market or credit) risk concentrations within the mitigation taken:

As the Bank presently accepts deposits (deposited with the Bank) as eligible financial collateral, there is no concentration risk within the mitigants.

DF-6 Securitisation Exposures: Disclosure for standardised approach

The Bank has not originated any securitized instruments nor has made any investments in securitized instruments issued by other

DF-7 Market Risk in Trading Book

Market risk of the Bank is defined as the risk to the Bank's earnings and capital due to changes in the market interest rate or prices of securities, foreign exchange, commodities and equities as well as volatilities of changes. The Bank assumes market risk in its lending and deposit taking businesses and in its investment activities, including position taking and trading. The market risk is managed in accordance with the investment policies, which are approved by the Board. These policies ensure that operations in securities, foreign exchange and derivatives are conducted in accordance with sound and acceptable business practices and are as per the extant regulatory guidelines,

UNITED OVERSEAS BANK LTD - MUMBAI BRANCH

(Incorporated in Singapore with limited liability)

laws governing transactions in financial securities and the financial environment. The salient features of the market risk at the Bank are as under:

- Bank has exposures such as T Bills held in AFS category in "Banking Book" which is valued at carrying cost.
- Bank also has foreign exchange exposures which are marked to market for valuation.
- The Bank has detailed policies covering ALM, Market Risk, investments and foreign exchange risk management.

Qualitative Disclosure

The Group's market risk framework comprises market risks policies and practices, the validation of valuation and risk models, the control structure with appropriate delegation of authority and market risk limits. In addition, robust risk architecture as well as a new Product/Service Programme process ensures that market risk issues identified are adequately addressed prior to launch. Management of derivative risks is continually reviewed and enhanced to ensure that the complexities of the business are appropriately controlled.

Overall market risk appetite is balanced at the Group and Branch with the targeted revenue, and takes into account the capital position of the Group and Branch to ensure that it remains well-capitalised under stressed circumstances. The appetite is translated to risk limits that are delegated to business units. These risk limits have a proportional returns that are commensurate with the risks taken. Market risk exposures are managed within RBI guidelines and limits.

The objectives of market risk management are as follows:

- Management of liquidity
- Management of interest rate risk and exchange rate risk
- Proper classification and valuation of investment portfolio
- Adequate and proper reporting of investments and derivative products
- Compliance with regulatory requirements

Overview of Policies and Procedures

The market risk for the Trading Book of the Bank is managed in accordance to the Board approved Investment Policy, Market Risk Policy and Derivative Policy. These policies provide guidelines to the operations, valuations, and various risk limits and controls pertaining to various securities, foreign exchange and derivatives. These policies enhance Bank's ability to transact in various instruments in accordance with the extant regulatory guidelines and provide sound foundation for day to day Risk Control, Risk management, and prompt business decision making. The Bank also has a Stress Testing Policy and Framework which enables Bank to capture impact of various stress scenarios on Trading Book Portfolio. All these policies are reviewed periodically to incorporate changes in economic, business and regulatory environment.

Roles and Responsibilities: The Bank has Asset Liability Committee (ALCO), which is responsible for defining and estimating the market risk inherent in all activities. As regards to investments, the ALCO is responsible for the pattern and composition of investments. The middle office assesses the risk independently and is responsible for preparing stress testing scenarios, providing inputs in pricing market risk, performing revaluation and marking to market of market exposures.

Liquidity Risk

- Funding Liquidity Risk:** The risk to the bank's earnings or capital from its inability to meet its obligations or fund increases in assets as they fall due, without incurring significant costs or losses.
- Market Liquidity Risk:** The risk that an asset cannot be sold due to lack of liquidity in the market.

Liquidity Risk Framework is approved by Asset Liabilities Committee (ALCO). The Bank's ALM Policy defines the gap limits for the structural liquidity and the liquidity profile of the Bank. The Bank's ability to meet its obligations and fund itself in a crisis scenario is critical and accordingly, stress testing is performed to assess the impact on liquidity. The Bank also prepares structural liquidity statements, dynamic liquidity statements and other liquidity reports to manage the liquidity position.

Quantitative Disclosure

(₹ '000)

Capital Requirement	As at 31 March 2017
I. Interest Rate Risk	31,340
II. Equity Position Risk	-
III. Foreign Exchange Risk (Foreign Exchange & Gold)	6,278
Total Capital requirement for Market risks (I+II+III)	37,618

DF-8 Operational Risk

Operational Risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational Risk includes legal risk but excludes strategic risk and reputation risk.

Qualitative Disclosure

The Bank relies on the Group's framework of policies, processes and procedures, by

which business units identify, assess, monitor and control/ mitigate their operational risks.

Key Risk and Control Self-Assessment involves identifying and assessing inherent risks in Bank's key processes, as well as assessing the effectiveness of controls to mitigate the identified risks. Action plans to address issues are documented and monitored via Operational Risk Action Plans.

Key Operational Risk Indicators are statistical data collected and monitored by business and support units on an on-going basis to facilitate early detection of potential operational control weaknesses. Trend analysis is carried out to identify systemic issues that need to be addressed.

A database of operational risk events and losses has been established to facilitate the use of advanced approaches for quantification of operational risks. The analysis of loss trends and root causes of loss events helps in strengthening the internal control environment.

A Group Insurance Program is in place to effectively mitigate the risk of high impact operational losses.

With the increasing need to outsource for cost and operational efficiency, the Group's Outsourcing Policy and Framework ensures that outsourcing risks are adequately identified and managed prior to entering into any new arrangements and on an on-going basis.

Effective business continuity and crisis management strategies and plans have been developed and tested to ensure prompt recovery of critical business functions in the event of major business and/or system disruptions.

Besides the above, the Bank also undertakes the following to proactively identify operational risks in the operations and external environment.

- Robust processes for review of products and critical process prior to launch/modifications
- Monitoring of external OR events/frauds and gaining insights for improvements in processes/ controls.

Risk Management Committee reviews operational risk in accordance to its terms of reference. Risk Management Committee is updated quarterly on all key operational risk issues.

Quantitative Disclosures

As per the mandate from RBI, the Bank is following Basic Indicator Approach (BIA) for assessment of operational risk capital. Capital requirement for operational risk as per BIA as on 31st March 2017 is ₹ 93,792 ('000).

DF-9 Interest rate risk in banking book (IRRBB)

Interest Rate Risk in Banking Book (IRRBB) refers to the risk of potential reduction in or loss of earnings (Net Interest Income) and Capital (Economic Value) as a consequence of movement in interest rates. Interest rate risk arises from holding assets/liabilities and Off-Balance Sheet [OBS] items with different principal amount, maturity dates or repricing dates thereby creating exposure to changes in levels of interest rates. Objective of the Bank is to limit IRRBB under regulatory risk limits.

Qualitative Disclosures

Overview of Policies and Procedures

Interest Rate Risk is part of the overall ALM (Asset Liability Management) Policy and market risk policy of the bank. The Bank also has a Stress Testing Policy and Framework which enables Bank to capture impact of various stress scenarios on Banking Book Portfolio. All these policies are reviewed periodically to incorporate changes in economic, business and regulatory environment.

Asset liability committee (ALCO) is responsible for evaluating and institutionalizing appropriate systems and procedures for monitoring and managing the IRRBB of the Bank. The day-to-day responsibility of monitoring, evaluation and risk measurement rests with middle office. Interest rate sensitive gap statements across pre-defined time buckets are continuously monitored for measuring and managing the interest rate risk.

IRRBB Identification, Measurement, Monitoring and Reporting

The group market risk framework elaborates IRRBB architecture to measure, monitor and control the adverse impact of interest rates on the Bank's financial condition within tolerable limits. This impact is calculated from following perspectives:

- **Earnings perspective:** Indicates the impact on Bank's Net Interest Income (NII) in the short term.
- **Economic perspective:** Indicates the impact on the net-worth of bank due to re-pricing of assets, liabilities and off-balance sheet items.

The ALM & Market Risk Policies define the framework for managing IRRBB through measures such as:

- Interest Rate Sensitivity Report:** Measures mismatches between rate sensitive liabilities and rate sensitive assets (including off-balance sheet positions) in various tenor buckets based on re-pricing or maturity, as applicable.
- Duration Gap Analysis:** Measures the mismatch in duration of assets & liabilities and the resultant impact on market value of equity.
- Banking Book Value at Risk (VaR):** Estimates the maximum possible loss, at a

UNITED OVERSEAS BANK LTD - MUMBAI BRANCH

(Incorporated in Singapore with limited liability)

predefined confidence level, on the market value of banking-book over a certain time horizon under normal conditions.

- Earnings at Risk (EaR):** Estimates the impact on net interest income over one year horizon due to 1% changes in interest rates.
- Sensitivity Analysis:** Evaluates the impact on both trading and banking book due to parallel and non-parallel shifts in interest rates.
- Stress Testing:** Evaluates the impact on duration of capital of banking book under various stress scenarios. All the above risk metrics are measured on regular basis and reported to ALCO periodically as guided by the ALM policy of the Bank.

All the IRRBB risk metrics and behavioural analysis are measured on a regular basis and reported to the ALCO on a monthly basis.

Quantitative Disclosures

The Banks assesses its exposure to Interest Rate Risk in Banking Book using the Economic Value of Equity (EVE) approach & calculate likely drop in Market Value of Equity with 200 bps change in interest rates. The estimated impact of such shock as at 31st March 2017 is as follows.

Impact of Interest Rate Risk

(₹ '000)

Earnings Perspective (Impact on Net Interest Income)		
Currency	If interest Rate were to goes down by 200 bps	If interest Rate were to goes up by 200 bps
INR	(78,329)	78,329
USD	(45,530)	45,530
Others	-	-
Total	(123,859)	123,859

(₹ '000)

Economic Value Perspective (Impact on Market Value of Equity)		
Currency	If interest Rate were to goes down by 200 bps	If interest Rate were to goes up by 200 bps
INR	(75,648)	75,648
USD	(45,486)	45,486
Others	-	-
Total	(121,334)	121,334

Notes: The above impact is for 200 bps parallel shift in the interest rates for both assets and liabilities.

DF-10 General Disclosures for Exposures Related to Counterparty Credit Risk

Counterparty exposure

Counterparty credit risk in case of derivative contracts arises from the forward contracts. The subsequent credit risk exposures depend on the value of underlying market factors (e.g., interest rates and foreign exchange rates), which can be volatile and uncertain in nature. The Bank has exposure to derivative only in the form of forward foreign exchange transactions at present.

Credit limits for counter party credit exposure

The credit limit for counterparty Bank as well as Corporates is fixed based on their financial performance as per the latest audited financials. Various financial parameters such as NPA ratios, liquidity ratios, profitability etc as applicable are taken into consideration while assigning the limit. Credit exposure is monitored daily to ensure it does not exceed the approved credit limit.

Policies with respect to wrong-way risk exposures

Wrong way risk is defined as an exposure to a counterparty that is adversely correlated with the credit quality of that counterparty. Wrong way risk arises when there is a positive expected correlation between EAD and PD to a given counterparty. It tends to increase when the counterparty credit quality gets worse. There are two types of wrong-way risk, namely, specific wrong-way risk and general wrong-way risk. The Bank would identify material cases of wrong-way risk and identify the same in line with our HO credit policy.

Credit exposures on forward contracts

The Bank enters into the forward contracts in the normal course of business for positioning and arbitrage purposes, as well as for our own risk management needs, including mitigation of interest rate and foreign currency risk. Derivative exposures are calculated according to the current exposures method.

Credit exposure as on March 31, 2017

(₹ '000)

	Notional Amount	Gross positive fair value of contracts	Potential future exposure	Total Credit Exposure
Forward Contracts	14,564,129	259,685	291,283	550,968

(Incorporated in Singapore with limited liability)

DF-17 Summary comparison of accounting assets vs. leverage ratio exposure measure

(₹ '000)

S. No.	Particulars	As of 31 March 2017
1	Total consolidated assets as per published financial statements	16,730,817
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
4	Adjustments for derivative financial instruments	550,968
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	-
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	109,557
7	Other adjustments	(188,971)
8	Leverage ratio exposure	17,202,371

Reconciliation of total published balance sheet size and on balance sheet exposure under common disclosure

(₹ '000)

S. No.	Particulars	As of 31 March 2017
1	Total Consolidated assets as per published financial statements	16,730,817
2	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	-
3	Adjustments for securities financing transaction (i.e. repos and similar secured lending)	-
4	Adjustments for entities outside the scope of regulatory consolidation	-
5	On-balance Sheet exposure under leverage ratio (excluding derivatives and SFTs)	16,730,817

DF-18 Leverage Ratio

The Basel III leverage ratio is defined as the capital measure (Tier-1 capital of the risk based capital framework) divided by the exposure measure, with this ratio expressed as a percentage.

As per RBI guidelines, disclosures required for leverage ratio for the Bank at March 31, 2017 are as follows:

(₹ '000)

On-balance sheet exposures		
1.	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	16,730,817
2.	(Asset amounts deducted in determining Basel III Tier 1 capital)	(188,971)
3.	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	16,541,846
	Derivative exposures	
4.	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	259,685
5.	Add-on amounts for PFE associated with all derivatives transactions	291,283
6.	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	-
7.	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	-
8.	(Exempted CCP leg of client-cleared trade exposures)	-
9.	Adjusted effective notional amount of written credit derivatives	-
10.	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	-
11.	Total derivative exposures (sum of lines 4 to 10)	550,968
	Securities financing transaction exposures	
12.	Gross SFT assets (with no recognition of netting), after adjusting for sale accounting transactions	-
13.	(Netted amounts of cash payables and cash receivables of gross SFT assets)	-
14.	CCR exposure for SFT assets	-
15.	Agent transaction exposures	-
16.	Total securities financing transaction exposures (sum of lines 12 to 15)	-
	Other off-balance sheet exposures	
17.	Off-balance sheet exposure at gross notional amount	206,144
18.	(Adjustments for conversion to credit equivalent amounts)	(96,587)
19.	Off-balance sheet items (sum of lines 17 and 18)	109,557
	Capital and total exposures	
20.	Tier 1 capital	7,909,563
21.	Total exposures (sum of lines 3, 11, 16 and 19)	17,202,371
	Leverage ratio	
22.	Basel III leverage ratio (per cent)	45.98%
